

# ifi AURORA

Aurora is a wireless music system like no other. With a design inspired by Japanese architecture and a cabinet fashioned from bamboo, it makes a striking statement. Its sound is equally engaging, thanks to the unique collection of proprietary audio technologies nestling within.

Aurora delivers a gloriously expansive soundstage, brimming with vivid detail and contrast. It fills the room with sound as the Aurora Borealis fills the sky with light, electrifying your music and immersing you in the creativity of your favourite artists.

Truly, this is music on the grandest scale.
