

Above iFi's 'GO pod' wearable Bluetooth DAC/headphone amp, available as a stereo pair

## GO pod: Your Gateway to Extraordinary Audio, Now Available as a Standalone Unit

At iFi, we believe in delivering a complete audio experience that exceeds your expectations. That's why we didn't stop at just launching the incredible GO Pod; we went the extra mile to ensure that you receive the ultimate audio solution right out of the box. Collaborating with some of the world's most renowned IEM manufacturers, we have curated the perfect 'GO Pod + IEM' partnerships that revolutionized your listening experience.

We were thrilled to announce that the first 1000 GO pods produced came exclusively paired with a carefully selected pair of IEMs. Our extensive research and collaboration has resulted in combinations that harmoniously blend the power of the GO Pod with the sonic excellence of the accompanying IEMs. This limited edition 'GO pod + IEM' package became available for order at the international launch of the GO Pod on April 14th, 2023, at AXPONA – Audio Expo North America – in Schaumburg, Illinois.

The response to this partnership has been nothing short of phenomenal. The demand for the 'GO pod + IEM' packages far exceeded our expectations, and we couldn't be more grateful for your enthusiasm. Therefore, we are excited to announce that we will now be offering the GO Pod as a standalone unit, allowing you to unlock its remarkable capabilities with your own choice of IEMs.

As a standalone product is available now, the GO Pod will retail for an affordable price of \$399, providing unbeatable value for the audio quality and features it delivers. Each GO Pod will be accompanied by two ear loops, ensuring compatibility with MMCX and 2pin IEM connections right out of the box. For those who prefer other connection types such as Pentaconn, T2, and A2DC, we will offer additional ear loops priced at \$29 each, giving you the flexibility to use your GO Pod with a wider range of IEMs.

The GO Pod is not just a device; it's a gateway to an extraordinary audio journey. With its standalone availability, you have the freedom to explore and personalize your listening experience like never before. Immerse yourself in rich, detailed sound and experience the true potential of your favourite IEMs with the GO Pod.
